Maintenance:

The digital image is printed with UV Cured inks and care must be taken not to damage the image with harsh cleaning products, nylon scourers and brushes etc.

The image should be cleaned by using a non-foaming detergent diluted with warm water and a soft cloth. We recommend cleaning from the skirting upwards. This should avoid runs of dirty water staining the surface.

To avoid re-activating the adhesive, which could cause edges to lift, care should be taken not to over-wet the joins or to allow water to pool at skirting levels.

Once washed, rinse with clean water and dry by dabbing with soft towelling.

Under no circumstances should spirit based cleaners be used as these will degrade the vinyl base and remove the printing inks.
